How to Read This Report

REPORT STRUCTURE

This report is organized into the following sections:

1. Executive Summary	Search parameters, jurisdictions, and key findings including total conflicts identified.
2. Brand Intelligence	Company registry scan, domain availability, multi-language screening, and overall risk indicator.
3. Search Results	Country-by-country breakdown of identified potential conflicts with similarity scores.
4. Strategic Observations	Summary observations and recommended next steps based on the findings.

UNDERSTANDING RISK LEVELS

The following comparative risk labels are used throughout this report. **Risk levels are indicative, not determinative.**

Exact Match	An identical or nearly identical mark found. Highest level of potential conflict.
Elevated Risk	High degree of similarity in spelling, sound, or meaning. Significant potential for confusion.
Moderate Risk	Moderate similarity detected. Some potential for confusion depending on goods/services overlap.
Lower Risk	Minor similarity. Lower likelihood of confusion, though context-dependent factors may apply.

FILING COMFORT INDEX

Where applicable, a Filing Comfort Index score (1–10) is provided in the Brand Intelligence section. This score aggregates multiple data points — trademark conflicts, company registrations, domain availability, and AI-driven analysis — into a single indicative metric. A lower score suggests fewer identified risks; a higher score suggests more. This score is for informational purposes only and should not be the sole basis for filing decisions.

Note: Trademark offices retain absolute discretion, and outcomes may differ despite similar search results. Risk levels are indicative, not determinative.
